UniversalDispatchR

Showcase of exercises

This document showcases and documents all the exercises generated by UniversalDispatchR.

Markdown syntax can be used in the .csv files themselves:

- ~ $shine \sim \rightarrow \frac{shine}{}$
- *shine* → shine
- **shine** → shine

Homemade syntax makes it possible to have underlined words or phonetic transcriptions using LATEX's tipa package:

- $_$ shine $_ \rightarrow \underline{\text{shine}}$
- /shine/ \rightarrow / \int am/
- [SaIn] $\rightarrow \int am$

1. Vocabulary

1.1 No box

Reference file: pdfdata/901-vocabulary-demo.csv

6. Dotfill

Reference file: pdfdata/906-dotfill-demo.csv

Number of columns: 3
Column 1: Question

Column 2: Number of dotted lines to have on the fillable worksheet.

Column 3: Solution

| 1. | Who was Hogarth? |
|----|---------------------------|
| | |
| 2. | Why does he matter today? |
| | |
| | |

Page 8 of 30 Adrien Méli ©2024

7. Tables

- Column widths in row 1 determine those of the whole table.
- Row 1 can serve as a header if it features the word "header"
- Numbers in (brackets) in row 1 can be used to determine how wide the column will be: for instance, (80) indicates that the column will take up 80% of the table's column width
- Columns in row 1 containing Markdown syntax will apply the corresponding formatting to the entire column:
 - "..." \rightarrow for dotted lines
 - "//" \rightarrow for IPA
 - italics (*)
 - bold (**)
 - underlined (_)
 - crossed-out (~)

7.1 Example n°1: column widths

Reference file: pdfdata/907-generictable-demo.csv

Number of columns: Any

Additional information: See how just one column width (40) sets

those of the remaining columns.

| Column 1 | Column 2 | Column 3 | |
|-----------------------|----------------|------------------|--|
| Row 1 Column 1 | Row 1 Column 2 | Row 1 Column 3 | |
| Row 2 Column 1 | | Row 2 Column 3 | |

| Row 5 Column 1 | Row 5 Column 2 | Row 5 /ˈkɒləm/ 3 | |
| | | | |

Page 10 of 30 Adrien Méli ©2024

7.2 Example n°2: random row order

Reference file: pdfdata/907-generictable-demo.csv

Number of columns: Any

Additional information: a slightly different option in UniversalDispatchR can generate the same table but with a

randomized row order.

| Column 1 | Column 2 | Column 3 | |
|----------------|----------------|----------------------------|--|
| Row 2 Column 1 | | | |
| Row 3 Column 1 | Row 3 Column 2 | Row 3 Column 3 | |
| Row 4 Column 1 | Row 4 Column 2 | Row 4 Column 3 | |
| Row 1 Column 1 | Row 1 Column 2 | Row 1 Column 3 | |
| Row 5 Column 1 | Row 5 Column 2 | Row $5 / \text{kplem} / 3$ | |

Page 11 of 30 Adrien Méli ©2024

8. Random fillable tables

Reference file: pdfdata/907-generictable-demo.csv

Number of columns: Any

Additional information: Each row contains at least one cell filled, it's up to the students to fill the remaining cells. This works well for

irregular verbs.

| Column 1 | Column 2 | Column 3 |
|----------------|----------------|----------------|
| | | Row 1 Column 3 |
| | | Row 2 Column 3 |
| Row 3 Column 1 | | |
| | Row 4 Column 2 | |
| Row 5 Column 1 | | |

Page 12 of 30 Adrien Méli ©2024

9. QCM

Reference file: pdfdata/908-qcm-demo.csv

Number of columns: At least 4

Column 1: Question Column 2: Option 1 Column 3: Option 2

Last column: The index of the correct option.

Additional information: Note that in the same file, the questions do not need to have the same number of options. The indices of the correct options can be indicated with numbers or letters.

| What is the colour of the sky ' |
|---|
|---|

A. blue C. red

B. green D. yellow

2. What is the colour of **blood**?

A. red C. green

B. blue

3. What is the colour of grass?

A. yellow B. green

4. What is the colour of the /san/?

A. yellow C. green

B. red D. blue

Page 13 of 30 Adrien Méli ©2024

10. True or false

10.1 No justification

Reference file: pdfdata/909-truefalse-demo.csv

Number of columns: 2
Column 1: Statement
Column 2: Truth value

Additional information: The solution can be indicated with shorthand

"f" or "t".

1. Is the **sky** blue? TRUE FALSE

2. Is the /grass/ red? TRUE FALSE

3. Is blood yellow? TRUE FALSE

4. Is the sun green? TRUE FALSE

10.2 With justification

Reference file: pdfdata/910-truefalsejustification-demo.csv

Number of columns: 3
Column 1: Statement
Column 2: Truth value
Column 3: The justification.

1. The sky is blue. TRUE

2. Grass is **red**. TRUE FALSE

3. Blood is /'jeləʊ/ . TRUE FALSE

Page 14 of 30 Adrien Méli ©2024

FALSE

11. Conjugation

11.1 QCM

Reference file: pdfdata/911-conjugation-demo.csv

Number of columns: 3

Column 1: Beginning of sentence **Column 2:** Verb to conjugate

Column 3: End of sentence

Additional information: UniversalDispatchR automatically gener-

ates verbal options to choose from.

Number of columns: NA

Additional information: This example shows how an article can be easily formatted and integrated into a worksheet. Notice the line and

word numbers.

The Economist explains

Oct 24th 2022

How much do America's voting-access reforms affect turnout?

The most divisive laws have the least impact

THE PANDEMIC brought big changes to how Americans vote. States, which administer elections, made it easier to cast ballots by mail, introduced ballot drop-boxes and extended voting deadlines. Turnout in the 2020 election was the highest ever. Then some states rolled back those innovations. Last year an advocacy group tallied 34 laws passed in 19 states that made it harder for Americans to vote—more than in any year since it started counting in 2011. Most were passed by Republican state lawmakers who argue that such restrictions, including tough voter-ID requirements, target rare instances of voter fraud and build confidence in elections. Democrats say the laws are designed to reduce turnout, particularly among minority and younger voters, and thus their party's vote share. Are they right?

Reforms to voting access fall into distinct buckets, with different implications for turnout. Convenience measures, such as postal and early voting, are designed to make it easier to vote at places and times other than at one's assigned precinct on election day. These laws may allow registered voters to vote by mail without needing special justification such as illness (as in 27 states), or to have a postal ballot mailed to them automatically (which eight states do). Yet their effect is modest. Automatically mailing ballots to everyone raised turnout by two percentage points in California, Utah and Washington state, according to a recent study. Neither party gained an advantage. Offering no-excuse postal voting in Texas during the 2020 election appeared to have little effect on turnout or partisan vote share: more people simply switched from in-person to postal voting.

Some convenience reforms have a counterintuitive impact. A study found that early voting can actually decrease turnout when implemented without other measures, such as automatic voter registration. When voting becomes a private, homebound activity, people no longer have the reminder or sense of civic participation that comes with a common election day.

Voter-ID requirements, which determine what people need to prove their identity in order to cast a ballot, incite the most criticism from Democrats. Demands can be simple—a voter's name and address, for instance. Or they can be more onerous: Texas, for example, accepts a concealed-handgun licence but not a student ID from a state university.

Even if ID restrictions are a cynical attempt by Republicans to craft rules that give them an advantage, Democratic anxieties over widespread voter suppression appear unfounded. Such laws have a negligible impact on turnout or the parties' respective vote share, according to a countrywide study published last year . Almost all registered voters who habitually vote have the requisite ID, so the affected population is in fact quite small (one study estimated that 0.5% of registered voters in Texas lacked the ID to comply with the state's strict law).

The fixation on voter-ID laws ignores the reform that would most improve turnout: making it easier to register to vote. Such measures include same-day registration, whereby people can register and vote on election day, and automatic registration in the course of other government business, such as getting a driving licence. A recent study found that automatic re-registration of people who moved within a county in California increased turnout at the 2018 midterm elections by nearly six percentage points. That should cheer anyone keen to expand the franchise.
